

EURO DARIO FUENMAYOR CONTRERAS

SENIOR DEVELOPER | FULL STACK WEB, SERVICENOW AND ELECTRONIC SYSTEMS

Madrid, Spain | +34 651 477 371 | euro.fuenmayor.es@gmail.com | linkedin.com/in/euro-fuenmayor

PROFESSIONAL SUMMARY

Senior Full Stack Developer with more than 10 years of experience designing, developing, and integrating web applications and enterprise solutions, with a broad technical foundation that enables me to adapt quickly to new environments, tools, and technical requirements.

Specialized in full-stack development using PHP/Laravel, JavaScript/TypeScript, Vue.js, and MySQL/MariaDB databases, with experience in backend and frontend architecture, web service development and integration, version control, Agile methodologies, and application support.

With solid experience with the ServiceNow platform as Certificated Application Developer, participating in functional analysis, design, development, integration, implementation, and maintenance of enterprise solutions.

I complement my software development profile with a strong technical background as an Electronics Engineer and a master's degree in Telematics, bringing additional knowledge in systems, communications, technology integration, and infrastructure.

Additional experience in electronics, automation and the development of systems based on Microchip (PIC), Atmel (Arduino) and Espressif (ESP32) microcontrollers, including programming, hardware/software integration, sensors, communications, interfaces, applied artificial intelligence and machine learning. Approximately seven and a half years of experience in university teaching, postgraduate education and academic coordination in electronics, microcontrollers, control, automation, programming and networking.

TECHNICAL SKILLS

Platforms: ServiceNow

Backend: PHP, Python, Laravel, Express.js, Node.js, web services, MySQL, SQL

Frontend: JavaScript/Typecript, Vue.js (Vue 2/3), Next.js, Vuetify, Material Design, HTML5, CSS3, Bootstrap, jQuery

Electronics and embedded systems: Microchip PIC, Atmel/Arduino, Espressif ESP32, PLCs, sensors and hardware/software integration and PCB design, Applied Artificial Intelligence, and Machine Learning

Tools: Git, Jira, Confluence, UML, Arduino IDE, MPLAB, Proteus, PIC Simulator IDE, KiCad, CircuitMaker PHPStorm, Visual Studio Code

Others: Java, Angular, React and basic .NET development

PROFESSIONAL EXPERIENCE

Senior Developer | AUTOCONTROL - Asociación para la Autorregulación de la Comunicación Comercial

Apr 2022 - Present | Madrid

- Development of enterprise solutions on the ServiceNow platform as a Certified Application Developer, participating in functional analysis, design, development, integration, implementation, and maintenance of enterprise solutions, including projects involving the implementation and integration of Artificial Intelligence (AI) as part of the proposed solution.
- Development and maintenance of web applications and integrations using Laravel, Vue, Vuetify, HTML/CSS Bootstrap, MySQL.
- Participation in complementary development projects and integrations based on Python, Java and .NET.
- Code version control management with Git, LXC container management using Proxmox, Docker containers, strong proficiency in Ubuntu with WSL, basic knowledge of Microsoft Azure, familiarity with the Atlassian suite (Jira, Confluence, Bitbucket), and Agile methodologies.

Full Stack Developer - IT | 3Ways by Evidenze Scientific Events

Oct 2020 - Apr 2022 | Madrid

- Development and maintenance of full-stack web applications in general using Laravel, Vue, Vuetify, HTML/CSS Bootstrap, MySQL.
- Code version control management with Git, Docker containers, strong proficiency in Ubuntu with WSL, familiarity with the Atlassian suite (Jira, Confluence, Bitbucket), and Agile methodologies.

Web Developer | Web and Mobile Solutions (WAMSA)

Jan 2017 - Sep 2020 | Guatemala City and Madrid

- Full-stack development using Laravel, Eloquent, MySQL/MariaDB, Blade, JavaScript, jQuery, AJAX, Bootstrap
- Back-end and front-end development based on the previously defined specifications and an existing design/layout, which I extended by creating new views, modals, pop-up windows, controls, and other UI components.
- The web application development included social media account login, email-based authentication, account verification, user roles and permissions, an administration panel, user profiles, profile editing, image editing, multilingual support, notifications (web push, email, and in-app notifications), follower functionality, likes, favorites, and a custom user interaction system, among other features.
- Code version control management with Git, Docker containers, strong proficiency in Ubuntu with WSL, familiarity with the Atlassian suite (Jira, Confluence, Bitbucket), and Agile methodologies.

Freelance Developer

Jan 2005 - Present | Maracaibo, Venezuela; Guatemala City, Guatemala; Madrid, España

- Development of web and desktop applications using PHP/Laravel, Java/Spring boot, WordPress, MySQL/MariaDB, SQL and MS Access.
- Design of software/hardware solutions and electronic prototypes using Microchip PIC / Arduino ATMEGA / Espressif ESP32 microcontrollers with Arduino IDE, Proteus, CircuitMaker, MPLAB, Proteus and PIC Simulator IDE and printed circuit boards (PCBs) with KiCad and Proteus. Applied Artificial Intelligence and Machine Learning.

Web Developer | Consulate General of Venezuela in Milan

Jan 2014 - Jun 2014 | Milan, Italy

- Development and maintenance of the institutional website in WordPress, using a frontend/backend architecture and MySQL database.

Systems and Technical Support Lead | Jesús Nazareno Parish

Since Mar 2012 | Maracaibo, Venezuela

- Development of management systems for registering volunteers and members, generating reports and tracking events.
- Coordination of logistics and preparation of the IT infrastructure required for system implementation.

School Coordinator | Instituto Universitario de Tecnología Readic UNIR

Oct 2010 - Feb 2012 | Maracaibo, Venezuela

- Academic and administrative planning for the School of Electronics, supervising a teaching team of 20 people.
- Management of training, extracurricular activities and initiatives aligned with graduate competencies and quality policies.

DETAILS OF TECHNICAL SKILLS		
PLATFORM / TOOL	TECHNOLOGIES	SELECTED DEVELOPMENT WORK
ServiceNow	ServiceNow platform, JavaScript, Glide APIs, REST, JSON, XML, HTML/CSS, AngularJS	Certified Application Developer responsible for platform application development and maintenance using Agile methodologies. REST Messages and Scripted REST APIs. Flow Designer, Business Rules, Scheduled Jobs and Events. Service Portal, Service Catalog and Widgets. Script Includes, UI Actions, UI Policies and UI Scripts. Access Control Lists (ACLs), applications and modules. Global application development in ServiceNow Studio. Update Set management. Third-party integrations, including OpenKM and custom API applications. Additional platform configuration and development activities.
Laravel	PHP, JavaScript, AJAX, jQuery, HTML/CSS, Blade, Vue.js, Eloquent ORM, MySQL/MariaDB, SQL, Socialite, Passport, Artisan, Composer, npm	Design and development of REST APIs and data services following Domain-Driven Design (DDD) principles, with Passport and Sanctum authentication, caching, pagination, and clear separation between application, domain, and infrastructure layers. Implementation of domain-oriented business logic using services, repositories, entities, value objects, and use-case-based application flows where appropriate. Development of modular backend architectures in Laravel, separating business rules from framework, persistence, and delivery concerns. Use of repository patterns and Eloquent ORM for persistence, database abstraction, domain data access, and seed-data generation. Integration of Socialite-based social authentication within modular application flows, maintaining clear boundaries between authentication infrastructure and business logic. Development of MVC and Blade-based presentation layers while keeping domain and application logic decoupled from controllers and views. Development and integration of Vue.js components, sliders, alert systems, and Material Design-based user interfaces connected to domain-oriented backend services. Implementation of responsive layouts with Bootstrap and multilingual applications using Laravel localization. Development of image processing, email, web-push and native notification services, search, filtering, sorting, and other application-level capabilities. Integration of external services such as Google Maps and Stripe through dedicated application and infrastructure services, avoiding direct coupling with core business logic. Modeling and implementation of business rules, application use cases, validation flows, and user interaction processes around domain concepts and responsibilities. Maintenance and evolution of existing Laravel applications toward more modular, decoupled, and domain-oriented architectures
Vue JS (2/3)	TypeScript, JavaScript, Vue Material Design, npm	Frontend development with Vue for managing patient data provided by a Laravel backend. Development and maintenance of Vue components, views, forms, and reusable UI elements. Integration and consumption of REST APIs provided by Laravel backend services. Development of responsive user interfaces for desktop and mobile environments. Use of Vuetify components and implementation of user interfaces following Google Material Design principles and guidelines. Maintenance, refactoring, and enhancement of existing Vue 2 codebases. Development of prototype applications using Vue 3, TypeScript, and Bootstrap 5. Creation of reusable components and modular frontend structures in Vue 3. Development of forms, validation flows, and dynamic user interfaces. Integration of frontend applications with backend APIs and external services. Experience working with state management solutions in Vue applications, where required.
WordPress	PHP, JavaScript, AJAX, jQuery, HTML/CSS, MySQL/MariaDB, MSSQL, WooCommerce, WP REST API, WP-Cron, WP-CLI, Bedrock, Composer, npm	Product/item synchronization between sales or inventory databases (MSSQL and Google Sheets) and website databases. REST APIs, WP REST authentication and OAuth 1.0a authentication. Cron-task and WP-CLI management; reading and writing Google Drive files and Google Sheets data. Bedrock-based code organization; WooCommerce, its REST API and extensions. Child-theme customization through actions and filters, including HTML, PHP and JavaScript changes. WP AJAX; cart, shop, checkout, shipping, payment-gateway and product-comparison customization. Plugin and widget creation and customization; multilingual string management.
Electron.js / Express.js / Next.js	TypeScript, JavaScript, npm	Alpha desktop application connecting to electronic access-control devices, synchronizing data and monitoring access through doors assigned to configurable zones.
Flutter	Dart	REST API data consumption. OAuth 1.0a signature generation for REST API requests. Development of basic widgets.
Bootstrap 3 / 4 / 5	HTML/CSS, JavaScript, jQuery	Layout and implementation of standard and custom forms, home pages, user profiles, CMS-style administration panels, modals, pop-up windows and interface controls.
Version Control	Git, Bitbucket, GitHub	Source-code version management with Git.

DETAILS OF TECHNICAL SKILLS		
PLATFORM / TOOL	TECHNOLOGIES	SELECTED DEVELOPMENT WORK
Project Management	Jira, Agile (Scrum, Kanban)	Application of Agile practices using the Kanban method.
Hosting Management	Linux, cPanel, FTP, XAMPP, WampServer, Windows, Laragon, Plesk, Ubuntu WSL, Docker	Production deployment and administration of websites.

TEACHING EXPERIENCE

Professor and Academic Supervisor | Universidad Rafael Belloso Chacín (URBE)

Sep 2014 - Nov 2016 | Maracaibo, Venezuela

Process control, intelligent control, nonlinear systems, network management, advanced routing and switching on postgrade area.

Professor | Universidad del Zulia

Mar 2016 - Jul 2016 | Maracaibo, Venezuela

Programming.

Professor | Universidad Rafael Belloso Chacín (URBE)

Since May 2014 - 3 cohorts | Maracaibo, Venezuela

Diploma Program on Programmable logic controllers and final project for the Diploma in Industrial Process Instrumentation and Automation.

Professor | Universidad Nacional Experimental de la Fuerza Armada

Jan 2014 - Nov 2015 | Maracaibo, Venezuela

Programming, artificial intelligence and systems implementation.

Professor | Instituto Universitario de Tecnología Readic

May 2011 - Aug 2011 | Maracaibo, Venezuela

Microcontrollers and Microcontrollers Laboratory.

Professor | Universidad Dr. José Gregorio Hernández

Aug 2007 - Jan 2010 | Maracaibo, Venezuela

Mathematics, circuits and networks, digital electronics, microprocessors and process automation.

Professor and Academic Supervisor | Instituto Universitario Politécnico Santiago Mariño

Sep 2004 - Feb 2005; Jul 2007 - Jun 2008 | Maracaibo, Venezuela

Control theory and process control, electrical circuits, mathematics, differential equations and electronics.

Professor, Supervisor and Instructor | CUNIBE and Instituto de Tecnología Pedro Emilio Coll

Sep 2005 - Jul 2007 | Maracaibo, Venezuela

Microcontrollers, microprocessors, digital and industrial electronics, PLCs, mathematics and electronic design.

EDUCATION

Master's Degree in Telematics | Universidad Rafael Belloso Chacín

2012 – 2014 | Maracaibo, Venezuela

Information technology and computer systems

Electronics Engineer | Universidad Rafael Belloso Chacín

1998 – 2002 | Maracaibo, Venezuela

Electrical and electronic engineering

SPECIALIZED EDUCATION

- Diploma in Higher Education Teaching - Universidad del Zulia (2005). Maracaibo, Venezuela.
- Diploma in Automation Technology Management - URBE (2003, 132 hours). Maracaibo, Venezuela.

CERTIFICATIONS AND CONTINUING EDUCATION

- Certified Application Developer (CAD) [ServiceNow, Jul 2026]
- Web Services Development [Grupo Colón IECM, Madrid, Jan 2020]
- IFCT026PO – Cloud Computing [Grupo Colón IECM, Madrid, Feb 2020]
- IFCT004PO – Web Accessibility [Grupo Colón IECM, Madrid, Feb 2020]
- IFCM007PO – Google and Its Applications [Grupo Colón IECM, Madrid, Mar 2020]
- IFCM026PO – Information Security and Digital Signature [Grupo Colón IECM, Madrid, Mar 2020]
- IFCM018PO – Android Application Development [Grupo Colón IECM, Madrid, Jan 2020]
- Cisco Networking Academy - CCNA Networking Basics and Routers and Routing Basics Cisco Networking Academy Program – [Academia URBE, Maracaibo, Venezuela, 2002]
- Industrial Automation - Siemens S7-300, Profibus and Allen-Bradley PLCs [Universidad Metropolitana – Automatización, Caracas, Oct 2003]

HONORARY DIPLOMAS

Undergraduate: Introduction to Computing; Algorithms and Programming.

Postgraduate: Electromechanical Principles; Linear Systems Analysis; Process Control; Digital Systems and Microprocessors; Linear Optimal Control; Data Communication Networks; Applied Mathematics; Legal Framework for Information and Communication Technologies; Server Systems and Data Services; Network Interconnection; Network Management; Storage and Backup Systems; Advanced Routing and Switching; Telematics Project Management.

LANGUAGES

Spanish: native

English: intermediate
